

License Server Functions Incorrectly After Upgrading to Windows XP SP2

Problem

The Seapine License Server functions incorrectly after you upgrade to Microsoft Windows XP SP2.

Cause

Windows XP SP2 includes new security features and other operating system changes and enhancements that may impact the Seapine License Server. Windows Firewall is enabled by default and blocks unsolicited connections to your computer.

Solution

Upgrade to Seapine License 2.0.1 or later. [Download](#) the latest version of TestTrack or Surround SCM to upgrade the license server.
