

# License Server RDBMS Support

**Note:** The following information applies to the current version of the Helix ALM License Server. If you use an older version, see [Seapine License Server 3.1-2008 RDBMS Support](#).

The Seapine License Server database can be stored in native database or Relational Database Management System (RDBMS) format. Following are the supported platforms, database vendors, and versions for the current version of the license server.

Refer to 'Setting Up RDBMS Databases' in the [License Server help](#) for additional information.

## Windows

- Microsoft SQL Server
  - 2008 Enterprise, Standard, and Express Editions
  - 2012 Enterprise, Business Intelligence, and Standard Editions
  - 2014 Enterprise, Business Intelligence, and Standard Editions
  - 2016
- Oracle 10g, 11g, 12c
- PostgreSQL 8.3, 8.4, 9.0, 9.1, 9.2, 9.3, 9.4, 9.5, 9.6

## Linux

- Oracle 10g, 11g, 12c
- PostgreSQL 8.3, 8.4, 9.0, 9.1, 9.2, 9.3, 9.4, 9.5, 9.6

## Oracle OCI driver

If you use Oracle, you must download and install the Oracle OCI driver on the license server computer:

- Windows installers: [32-bit](#), [64-bit](#)
- Linux installers: [32-bit](#), [64-bit](#)
