

License Server System Requirements

Following are the minimum system requirements for the current version of the Helix ALM License Server application. Running the license server on a slower computer can impact performance and cause locking errors.

Note: The 64-bit license server is only supported on 64-bit operating systems.

Windows

- Server 2008, 7, Server 2012, 8, 8.1, 10, Server 2016

Linux

- CentOS 6.8 - 7.4, Debian 8 - 9, Fedora 23 - 27, openSUSE Leap 42.1 - 42.3, Red Hat Enterprise 6.8 - 7.4, Ubuntu 14.04 - 17.10
- Pentium PC

Note: The license server database is stored in an RDBMS. See [RDBMS Support](#) for information about supported platforms, database vendors, and versions.
