

# Supported Email Protocols and Standards

TestTrack supports MAPI, SMTP, and POP3 mail transport. The SMTP and POP3 standards used by TestTrack are:

- Simple Mail Transfer Protocol (SMTP ) as outlined by the Internet standard RFC 821
- Post Office Protocol version 3 (POP3) as outlined by the request for comments RFC 1460, RFC 937, RFC 918, and RFC 1725, RFC 1939, and Internet standard 5
- Internet messages formats: Standard for the message format of the ARPA Internet text message (RFC 822) and Standard for Interchange of USENET messages (RFC 850 and RFC 1036 )
- The MD5 Message-Digest Algorithm - RFC 1321
