

# Enabling MAPI for Use with TestTrack

**Note:** The following information only applies to TestTrack 2011.1 and earlier.

You need to enable MAPI if you are running the TestTrack Server as a service.

1. Choose Start > Settings > Control Panel > Administrative Tools.
2. Double-click the Services icon.
3. Select the TestTrack service and choose Action > Properties.
4. Click the Log On tab and select 'This account' as the Log on as option.
5. Click Browse to select an account that has MAPI profiles associated with it.
6. Optionally enter and confirm the password you use with this account.
7. Click OK to save the changes. MAPI should now be enabled for TestTrack.
