

Helix ALM Supported Web Servers

Helix ALM web clients require a web server to host HTML files and execute CGI scripts. The CGI scripts connect to the Helix ALM Server using a TCP/IP connection.

Web clients can run in any of the supported browsers. The Helix ALM Server can run on platforms listed in server system requirements. Web clients are compatible with web servers that run on these platforms.

Following are the supported web servers for hosting the web clients.

Apache

- 2.2
- 2.4

Microsoft Internet Information Server (IIS)

- 6.0
- 7.0
- 7.5
- 8.0
- 8.5
- 10.0
