

Helix ALM Supported Web Servers

Helix ALM web clients consist of a set of HTML files and C-style CGI scripts. The web clients require a web server to host the HTML files and execute the CGI scripts. The CGI scripts connect to the Helix ALM Server using a TCP/IP connection.

The web client HTML pages are compatible with browsers that support HTML 4.0 or newer. The Helix ALM Server can run on platforms listed in [Server System Requirements](#). The web clients are compatible with web servers that run on these platforms.

Following are the supported web servers that can be used to host Helix ALM web clients.

Apache

- 2.2
- 2.4

Microsoft Internet Information Server (IIS)

- 6.0
- 7.0
- 7.5
- 8.0
- 8.5
- 10.0
