

Changing the Helix ALM Server to a Service

On Windows, we recommend installing the Helix ALM Server as a service. A service is a program that automatically starts when the computer starts and automatically stops when the computer is shut down.

To change the Helix ALM Server to a service:

1. Choose Start > Run to open the Run command window.
2. Enter "C:\Program Files\Perforce\Helix ALM\Helix ALM Server.exe" -install in the Run command window. This example shows the default install path. If you installed in a different directory, enter that information.
3. Enter "C:\Program Files\Perforce\Helix ALM\Helix ALM Server.exe" -remove to uninstall as a service.
