

# Differences in Features Between the TestTrack Pro Client and TestTrack Pro Web

**Note:** The following information only applies to TestTrack 2013.0.2 and earlier.

The TestTrack Pro Client and TestTrack Pro Web provide most of the same features with a few exceptions. The following features are not supported in TestTrack Pro Web:

- Integration with source code control (SCC) applications - TestTrack Pro Web only provides read-only SCC information
- Text file import and export - TestTrack Pro Web only supports XML import/export
- Creating reports other than detail, distribution, list, and trend reports
- Viewing live charts
- Ability to edit multiple records simultaneously
- Creating and managing folders - TestTrack Pro Web only supports adding and removing records in existing folders
- Capturing or pasting screenshots
- Type ahead searching, quick find, column filters, and list window tabs
- SoloBug customization
