

Forcing SoloSubmit to Log In to a Specific Project

You can force SoloSubmit to log in to a specific project using a direct link to the CGI. First, you need the project ID number. The ID number is listed in the first column of the Projects dialog box in the Helix ALM Server Admin Utility.

The CGI command you use should resemble the following:

IIS

`http://000.000.000.000/scripts/ttcgi.exe?command=SoloSubmitScreen&databaseid=1` (where databaseid is the project ID number)

Apache

`http://000.000.000.000/cgi-bin/ttcgi.exe?command=SoloSubmitScreen&databaseid=1` (where databaseid is the project ID number)
