

Setting SoloBug Default Values Using Command Line Parameters

SoloBug accepts command line parameters to set the default values for all issue fields. Parameters that contain spaces must be enclosed in quotes.

The following Windows parameters are supported:

- m summary (e.g. -m "This is the summary.")
- t type (e.g. -t "Crash - Data Loss")
- p product (e.g. -p "SoloBug")
- s severity (e.g. -s "No Workaround")
- c component (e.g. -c "Reporting")
- v version (e.g. -v "1.0.1")
- d description (e.g. -d "This is the description.")
- f attachment file (e.g. -f "Application.Log")
- r reproducible (e.g. -r "Cannot Reproduce")
- e steps to reproduce (e.g. -e "Following are the steps to reproduce.")
