

Customizing Microsoft Word Templates for Exported Requirement Documents

Note: The following information only applies to TestTrack 2015.1 and earlier. If you use Helix ALM (or TestTrack 2016 - 2016.1), see the help for information about [exporting items to Word](#).

Templates used for exporting requirement documents to Microsoft Word are installed with TestTrack. The templates include styles that are mapped to requirement summary and description text in TestTrack and are applied to text in the exported Word document. You can use one of the installed templates to create a customized template. See [Modifying Word Templates for Requirement Document Exports](#) for information.
