

Surround SCM Client System Requirements

Following are the minimum system requirements for the current version of the Surround SCM Client application.

Note: 64-bit Surround SCM applications are only supported on 64-bit operating systems.

Windows

- Server 2003, Vista, Server 2008, 7, Server 2012, 8, 8.1, 10, Server 2016

Mac

- 10.9 - 10.12*
- Intel-based Macintosh

* There are known issues installing and running Surround SCM on Mac OS X 10.11. See [Cannot Install or Run Applications on Mac OS X 10.11 \(El Capitan\)](#) for information.

Linux

- CentOS 6.6 - 7.3, Debian 7 - 8, Fedora 21 - 25, openSUSE 13.1 - 42.2, Red Hat Enterprise 6.6 - 7.3, Ubuntu 12.04 - 17.04
- 1.5 GHz CPU
- 512 MB RAM
