

# Surround SCM Crashes on Ubuntu 11.04

## Problem

The Surround SCM Client crashes on 64-bit Ubuntu 11.04.

## Cause

64-bit Ubuntu does not correctly load some ia-32 library dependencies required by the 32-bit Surround SCM Client. Refer to Ubuntu bug report [781870](#) for more information.

## Solution

Use the following command to set the correct catalog module to load the required 32-bit libraries before starting the Surround SCM Client.

```
export GDK_PIXBUF_MODULE_FILE=/usr/lib32/gdk-pixbuf-2.0/2.10.0/loaders.cache
```
