

# QA Wizard Pro Ports

QA Wizard Pro communicates via TCP/IP using the following default port numbers. You can change the port for security reasons or if another application uses it.

## QA Wizard Pro Server

- Communicates with the global application repository and status tool
- Default port: 8002
- To change the port in QA Wizard Pro, choose Tools > Options and click the Server tab.

## QAWRemote.exe

- Default port: 6001
- To change the port in QA Wizard Pro, choose Tools > Options and click the Remote Computers tab.
- To change the port on a remote computer, edit the sysconfig.xml file in the Application Data\Seapine\QA Wizard Pro directory.
