

611 Error When Testing Applications Using Microsoft Active Accessibility

Problem

The following error is returned when recording QA Wizard Pro scripts or populating the application repository for applications that use Microsoft Active Accessibility:

'Error communicating with the target application: [611].'

Cause

A known Visual Basic 6 issue occurs when an application using Microsoft Active Accessibility, such as Narrator, attempts to access a Visual Basic 6 application that uses a ListView or TreeView from Microsoft Windows Common Controls 5.0: Comctl32.ocx. Refer to [Microsoft Support article 896559](#) for information.

Solution

Install the [Visual Basic 6.0 Common Controls:mscomctl.ocx and comctl32.ocx update](#).
